

Start PuttView

1. Start computer

- Locate the PuttView computer and press the power button.
- After booting, the PuttView software will launch automatically on the computer. If not, please open the PuttView app manually on the desktop, using the cursor pad on the keyboard.

2. Start projector

After starting the PuttView app, the projector turns on automatically and you can see the PuttView projections on the green. If not, the PuttView software on the computer asks you to turn on the projector manually with the remote control (one press on the power button). After that click the continue button on the computer.

The remote control should be held as close as possible to the projector and pointing in its direction.

3. Start tablet app

If you have a P7, skip this step

- Swipe up on the tablet to unlock it
- Start the PuttView app
- Use tablet as remote control for your PuttView system

4. System is ON 

Shutdown PuttView

1. Close PuttView app on the tablet

Click on the "Shutdown" button in the top right corner of the PuttView app. (If you have a P7, click on the button on the monitor)

WATCH ON/OFF HELP VIDEO

2. Shut down computer

- Close the PuttView software by clicking on the top right „Quit“ icon. (If you have a P7, skip this step)
- Click on the Windows icon, click on power and finally on "shut down".

3. Switch off projector

After closing PuttView on the computer, the projector switches off automatically. If not, switch off projector with projector's remote control by pressing the off-button twice.

The remote control should be held as close as possible to the projector and pointing in its direction.

4. System is OFF
